This magazine has been produced by Year 6 students at the Malet Lambert Summer School in collaboration with Engaging Education.

Inside, you will find a mixture of fun and informative articles (researched and produced by these amazing young journalists) and three of the best comic creations - transformed by our Illustrator, Tony.

If the content of this magazine is making you lick your lips, then just drool at the fact that every article, feature and comic story has been produced by young people, especially for young people.

We hope you enjoy the Malet Lambert Summer School 2013 magazine!

Section 1

**ABOUT
HULL**

ALL ABOUT HULL

By Asailia Blowman, Jessica Newman & Kelly Riseam

Did you know that Hull is bigger than you think it is?

Come and explore the amazing Hull! If you are interested in art then visit our brilliant Ferens art gallery. Also, you can visit our fantastic Deep. It has lots of wonderful kinds of fish and marine life. However, we also have the whaling museum which is another top attraction in Hull. As well as having a great time at these attractions you can have an even better time at Hull fair, which is on every year in October.

As well as having a great time outside, why don't you have a great time inside with the Woodford leisure center? Here there are lots of things to do like enjoying the wave machine and water slide, also they have a baby pool where younger children can have fun. Furthermore it's not just all about swimming, it's also about having fun at the clubs that go on there all year round like: dancing, gymnastics, karate and lots more.

When you get hungry you can go into town and grab a snack from McDonalds. After that you could go to Queens Gardens and admire all the wonderful flowers. If you don't feel like fast food you can go to Frankie and Benny's, Nandos, Pizza Express, Pizza Hut and loads more. Or if you feel up for a movie and popcorn you can pop to the VUE cinema and watch a lot of new films like the Smurfs 2.

IN HULL

By Thomas Clarke & Jack Hague

Welcome to our guide to visiting all the exciting places in Hull. We'll take you on a journey around our amazing city!

The best places to see rugby in Hull are at the KC stadium and Craven Park. The KC stadium is the home of Hull FC. However, there's Craven Park which is the home of Hull Kingston Rovers - the rivals of Hull FC. The KC stadium is also the home of Hull City - the Premier League football team. Furthermore, Hull has some fantastic restaurants. The best places to eat in Hull are The Railway Inn and Mimosa, which is a Turkish restaurant; both of the restaurants are ranked five stars!

If your children love sport, Hull is a great place to be! There are many sports teams and leisure centres such as Woodford and Ennerdale leisure centre. Furthermore, there are many football teams, rugby teams and sporting clubs such as: boxing, karate and kickboxing. You can box at St Pauls and you can also do gymnastics at Sutton Village gymnasium.

At the Deep you can now see penguins and sharks! It is a great place to go if you've never been there before or love sea life!

OUR HULL

By Lucy Marsden & Katie Sullivan

Attractions for young people in Hull:

One of the many amazing attractions for young people in Hull is Lazer Quest. Lazer Quest is the game hide and seek with a high-tech twist. However, this fabulous day out is only recommended for children aged seven and over. Another fantastic attraction is Big Fun - a large indoor play area with four monster slides and five very safe trampolines. This brilliant indoor play area also includes a smaller play area for children aged four and under. An attraction we would highly recommend for children who like to be with their friends is Hollywood Bowl. This is an extremely modern and up to date bowling area which also includes an arcade.

Hull's main attractions:

The Deep - the world's only submarium - is the perfect day out for the whole family. It holds a whopping 3,500 fish including Europe's only pair of green sawfish. With opening times of 10am till 6pm, you have all the time in the world to explore this wonderful aquarium. Princes Quay is the perfect place to shop, eat and visit the Vue cinema.

Best places to eat and drink:

Nandos, the highly popular restaurant, appears many times in Hull's shopping centres. If your busy but still want a Nandos for lunch, there is always the take away option. Pizza Express is another great place to grab lunch; this terrific Italian is home to lots of pizza and pasta.

YOUR HULL

By Zarra Farrer

Hello and welcome to our magazine, about Hull. Here you will learn about the fantastic attractions for young children and older people.

Attractions for young people

The amazing East Park is a great place to visit. Here there are numerous things to do such as riding the splash boat, seeing the animal collection of snakes, tarantulas, millipedes, beetles and many more things. At Pearson Park there is a brilliant terrarium and a pond.

Main attractions in Hull

The Deep is the world's only subarium. The different types of fish include clownfish, sharks and many more. There is also a Hull fair that is one of the largest travelling fairs in Europe. The fair is one of Hull's biggest traditions, as well as one of its oldest, having reached its 700th anniversary in 1993. Carrying on with such tradition, the fair is opened by the Lord Mayor of Hull on the first evening, normally at 5 pm. It first opened from 9th to 23rd March 1278.

My tips for visiting Hull

Visiting the brilliant city of Hull is the best feeling ever, so I hope you enjoy Hull as much as I do!

WHAT IS HULL?

By Holly Davidson & Bethany Jefferson

We think Hull is better now than it ever has been. Hull has lots of new places including clothes and shoe shops. All the schools look wonderful with all the new play areas and things to sit on.

Hull fair is brilliant and fantastic for young children and adults as well. Adult rides are extremely scary, however on some rides children can go on them with parents. For small children the rides are really fun and they aren't scary. Also at Hull fair you can buy food, drinks and play games like hook a duck!

In Hull, the Toy Shop is a great place for children to go because there are lots of great toys. However, it may be expensive and you may only be allowed toys as a treat.

Swimming is good for you because it keeps you fit and keeps children healthy and happy. At some of the swimming pools in Hull such as Woodford, there are slides that are great fun for children. The Woodford leisure Centre is an amazing place for children.

The cinema is good for a day out and there are films for everyone. Furthermore the films that are out now are: The Smurfs 2, Despicable Me 2, Monsters University, Grown Ups 2 and a lot more. These films are outstanding! Bowling is also good for a day out! Therefore, we would recommend going there - although we don't go often.

HULL'S THE BEST

By Ben Brown and Lillie-Mai Green

The Deep

The Deep is one of the most spectacular aquariums in the world and is home to a whopping 3,500 fish. The Deep also has Europe's only pair of green sawfish, spectacular sharks and rays. The Deep is a 5 minute walk from Hull Marina and is close to the City Centre. If you want a fun day out then The Deep is definitely the place to go! At the Deep you can see the amazing story of the world's oceans through stunning marine life and fun, interactive presentations. The Deep is an environmental and conservation charity dedicated to increasing the knowledge and understanding of the world's oceans.

Hull Fair

This carnival of merriment is the largest travelling funfair in Europe and one of the oldest. Local tradition states that the changing of the calendar in 1751 led the locals to believe the loss of eleven days affected their fair. "Give us back our eleven days," was the cry as an enraged mob charged around the streets of Hull, calling for the return of their eleven day festivities which they believed to have been lost due to the calendar change. The outraged masses got their wish and from that year onwards 11th October, or the Friday nearest to it, became the official date for Hull Fair.

KC Stadium

The KC Stadium, or KC, is a multi-purpose stadium that cost approximately £44 million to build! It's called the KC as Kingston Communications sponsor the stadium name. The stadium is currently used by Hull City football club and Hull FC the rugby league side. The KC stadium has a current capacity of 25,586! Musical acts have also performed here such as The Who and Elton John. It has also played host to large sporting events such as international rugby matches and two exhibition Twenty20 cricket matches between Yorkshire CCC and a Lashings World XI.

**MOVING
UP TO
HIGH
SCHOOL**

MOVING UP

By Courtney Lill

Some students may have questions buzzing all around their minds; What do I do? Will they like me? Will I get bullied? What if I get lost? Well this article is here to explain what high school is like and to answer a few of your queries. There are also a few handy and helpful tips.

I suppose some students wonder ‘well what makes high school different from junior school?’ To start off with, students have a lot more independence, although some students don’t use this independence properly therefore they get punished. However, they get a reasonable punishment I can assure you! You also have lots of varied lessons (on different subjects of course). Furthermore, students meet a lot of different teachers; this helps students to socialize with different people and allows them to know how they should act towards new people.

Here are 10 amazing, brilliant and fantastic tips to help you through high school:

1. You need to socialize and make friends, it’s a skill of life and you won’t feel so intimidated by other people.
2. Get help straight away if you’re being bullied mentally or physically, even if they have just called you a name, TELL SOMEONE!
3. Do your homework – You don’t want detentions!
4. Study - Good grades, good life!
5. Try to stay focused in lessons; your grades depend on it!
6. Try to be on time, again you don’t want a detention and you may miss something important!
7. Keep your grades up!
8. Keep organized - tidy things, tidy mind!
9. Keep your planner updated, you don’t want to forget anything important!
10. Show your school spirit - life is what you make of it!

Those are the top 10 most helpful and handy tips to high school!

High school can be worrying I know; but you only get one shot at it, so make it count! Think positive thoughts as it’s really not as bad as you think! Believe in yourself, anything can happen.

HIGH SCHOOL

By Kiana Tait

Moving up to High School can be a very scary thing, therefore read this article to feel better about school. As you move up you will notice a few differences.

Fantastic Differences

Malet Lambert High School, which is bigger than junior school, is a school for 11-16 year olds. There are a lot more people in high school, however you might not talk with all of them. You will have different classes, more subjects and more choice.

Fears

As you move up you may have some personal feelings about it such as: being scared, excited, nervous or you may even feel a little bit sad about leaving your old school. Although you feel that way, some people might be feeling a lot more grown up or even feeling the same as you. Remember, the teachers are there to help you and make you feel a lot happier.

Preparing

To prepare for moving up to high school you could visit the school for a tour, meet the teachers and communicate. Furthermore, you might want to join clubs to make friends. You may want to ask pupils who already go to the school for more information. You should get ready by buying the right things.

OPPORTUNITIES

By Danielle Acey, Jessica Acey
& Alisha Ellerington

The first day:

You may feel excited or nervous but you need to remember you're not the only person whose first day it is. If there is a whole group of people staring at you don't think negatively of this...try talking to them to make new friends. On your first day you may know very little but after a few days you will get to know your way around the school.

Changes at High school:

At primary school you probably only have one teacher that teaches you except maybe for sport and music. At high school you will have a lot of new teachers and classrooms to go to. Also, you will always have to be prepared for every lesson and be there on time!

New stresses:

Although going to high school can be exciting and fantastic you will feel a little stressed sometimes in the day. Here is a list of when you may feel stressed:

If you're lost and confused
That you may not be with your old friends
Lonely and unhappy
Anxious and afraid
Worried that you will not fit
Tired and worn out from everything you've been doing

How to cope:

Stay in contact with your old school friends and don't try and show off in front of people.

Section 3

**YOUR
CAREER**

ANIMATOR

By Zane Greaves and William Longton

This guide will tell you step by step about how animation works.

Step one: First there is pre-production, this means you get a storyboard and you think up ideas, until you come up with the story and how you are going to position the cameras.

Step two: Once you've got your ideas you put them on the table until you come up with the actual story. Once you have the story, the storyboard will be used so you don't forget the scenes and what you have to do with them.

Step three: After the storyboard is approved it is sent to the layout department. They then sort out the costumes, the shape of the plastering, the drawings and everything that will need to form part of the animation.

Step four: Model sheets show you the form of the character and the scenery.

I hope this article has helped you to see how you would start to produce your own animation.

ANIMATOR 2

By Francois Panupabi & Tyler-James Bentley

Thinking of being an animator? Fantastic! However, you need to understand the hard work and time it takes to become an animator. Although, it is worth it!

To become an animator you need to; be good at maths, have computer skills, be able to work in a team and have hobbies to do with cartoons and animations.

You also need to go to a University and take a degree in animation. Furthermore, if you took art classes this may help you. You also need to work quickly, have a good eye and work well with colleagues and other people.

By watching animations or cartoons you could get some ideas for your own creations.

If you work amazingly you could become a director, storyboard artist, cameraman or a cg rigger.

Therefore, work hard in high school and you'll get a marvelous job in animation.

MOTO GP

By Jayson Foots and Lennon Norrie

So you want to learn how to become a Motogp pro? Sit back and read this amazing guide that will show you the ins and outs of a Motogp career.

Early Days

The best thing to do is start riding at an early age; this is between 4 and 16. Try and get some side wheels and don't forget your clothing and helmet! Progressively, start riding bigger and faster motorcycles.

Training for 125cc

Start with a 125cc, try and take it to track days and get lessons. You need to stay fit and healthy, eat lots of fruit and veg as you need your five a day! Ride your motorbike lots to get more experience on the bike.

125cc

Eventually you can start racing! Through this you may one day earn sponsorship, this is where companies pay you money to advertise their brand on your bike or your leathers. Examples of sponsors include; monster energy, red bull, etc.

Follow these tips and one day maybe you could become a Motogp rider. This is our dream!

ICT CAREER

By Theo Farrer

Do you want to know what careers are or how to make it in a career? Well I can tell you.

My favourite subject at the moment is I.C.T; I own my own laptop, my own iPad and my own android mobile. I have to admit; when I am older I would like to be in the I.C.T sector. I will tell you more about what I know.

Firstly, if you want to have an I.C.T career, you need to know the basics like how to turn a computer on and off, then how to use the desktop and how to open and close a piece of software like Internet Explorer and Microsoft Word.

Secondly, you need to know about the different ports on a computer such as: the USB ports, VGA ports, Ethernet ports etc. You will also need to know how to add a new user account and how to change certain settings, like how to add an internet connection.

Thirdly, you need to know how to set up a computer. If you find it a bit difficult you could always take it in to your local computer store, however, most people can help you without you having to leave your home or even your chair!

I hope you have taken note of this article and good luck when choosing your career!

FASHION DESIGNER

By Leigh Rose

In this article I will explain what it takes to become a famous Fashion Designer.

The job description

The fashion industry is all about designing! You create clothes such as: dresses, suits and skirts. Accessorising things such as shoes are also a big thing; as a designer, you do get to work with a lot of machinery such as sewing machines.

Education

Schools such as Malet Lambert allow you to take textile classes, which are a big attraction to pupils who want to work in fashion. Colleges also run fashion courses, so when you leave school you can take a more intensive fashion course. University offers a more tailored fashion designing course; this will then lead you to your career in fashion.

Work experience

If you would like to go further with your career in fashion, it's essential to gain work experience in the industry, you can do this by working with a fashion magazine such as vogue. They could guide you and give you important tips, which could help you in your career as a fashion designer.

Hobbies

Several hobbies such as sewing and fashion would be good for this sophisticated career. Leigh Browey quoted; "persevere and keep going until you get somewhere."

CONSERVATION

By Chloe Harman & Rhiannon Gunton

This article will tell you about wildlife conservation. Wildlife conservation is important for the future as if we don't look after our wildlife the future may be very different. Here are some helpful tips that you can follow to ensure we have wildlife in the future.

Leave a patch of grass untrimmed to give a home to wildlife. This will encourage insects to come to your garden. Try planting trees in your garden; this will give birds a home. Schools also help wildlife by placing bird boxes on fields.

You could try volunteering for a job in one of the many wildlife trusts, this will give you a better understanding of nature and wildlife.

Wildlife is important to the community; if you're interested in seeing some wildlife, there are lots of different types of brilliant wildlife in East Park. Wildlife is important to the environment to make the world healthy.

Section 4

**ASPIRING
STARS**

BEN BARBA

By Morgan Cutsforth & Joshua Hutchinson-Gleadow

Benjamin 'Ben' Barba, is a star in the making. At the age of 24 he still shines like a star with his mercurial skills and his rapid pace. Ben plays for Canterbury-Bankstown Bulldogs; however, there is a possibility that he might move teams. What do you think of this?

Ben Barba was born on June 13th 1989 in Darwin with his four siblings; furthermore, being the youngest, he was the one that was fantastic and has been the most successful.

Ben Barba in his early years - before becoming a super legend - washed cars for a living. But he doesn't have to do that now. Ben Barba is a fan of the camera as he always lets fans take their picture with him.

Therefore, follow your dreams and aspirations and one day you will succeed. You may even be as successful as Ben Barba.

TRAVIS BURNS

By William Stockton

This article will tell you everything you need to know about Travis Burns - the rugby league player.

Travis Burns was born on 6th February 1984. He is a utility player that plays number 6 for Hull KR. He is an amazing player that came to Hull KR from Penrith Panthers in Australia. Before them, he played for North Queensland and Manly Sea Eagles. When he was at Manly Sea Eagles, Travis was rookie of the year for 2006!

He weighs 85 kg and is 175 cm tall. He made 177 appearances in the NRL before moving to Hull and he helped Penrith finish second in 2010. Furthermore, he has scored 3 tries and has kicked 3 goals in 13 matches for Hull KR.

Section 5

**THE
FUTURE
OF
HULL**

HULL IN 2017

By Bethany Drury

Do you wonder what our world will be like in 2017? Well if you do, keep reading and find out how Hull will change massively in the next 4 years!

We know our city as Hull, however in 4 years time our city may be called the 'city of culture'! As part of this, many religious buildings will be built so that there will be more places for people to pray.

Also, because the city is changing, the council will want to ask young people and adults reading this magazine what would be a good replacement for closed down shops and centres? Being a young person writing this article, I got the chance to interview other young people, to find out how they think they could help make Hull the 'city of culture'. I was told by the young minds that they would build a superstore that includes many clothing ranges and accessories for religious people. Also they wanted to have a zoo themed children's diner. Last but not least they thought of building an Indian drive in on Holderness road.

To make this city a safer place, I think that the Deep should be moved to a different place because it is placed right on top of the river Humber, if it was moved there would be a lower risk of people falling into the river. As a shopper I think that the town centre should have many more shopping facilities for the young and old.

CULTURE CITY

By Chloe Hill & Rebecca Lambert

Will Hull be the future 'City of Culture'? A lot of people that think that in 2017 Hull will be a cultural and brilliant city to live in. Here are some ideas the public have.

There are lots of people on the internet saying there are too many takeaways in Hull. Here is one of the many quotes I found:

A kebab shop owner stated that "There are too many takeaways in Hull; everyone is now complaining that they're gaining weight when they are the ones eating too many takeaways."

This problem can be solved for the fantastic future ahead, by changing some takeaways to different cultural restaurants and making them healthier.

The public also say they would like more buildings in Hull such as: shopping centres, libraries, swimming baths, all age clubs for young people and a pub in each neighbourhood.

Hopefully things will change in Hull and in 2017 it will be the 'City of Culture'!

OUR FUTURE

By Oliver Thorn

Earlier in June this year, Hull put forward a bid of £11 million to try and be the 'City of Culture' in 2017. If they get to be the 'City of Culture' they will be holding 1500 events, 25 festivals, 12 artist residencies and projects reaching into the streets throughout the city. This article will tell you what improvements the city will benefit from.

Although people say that the KC Stadium is absolutely amazing, it could be improved further if there was more seating as Hull City A.F.C (now known as Hull City Tigers or Hull Tigers) have been promoted to the Premier League. Therefore, more people will be able to watch Hull City against teams such as: Manchester City, Liverpool and Chelsea. If the stadium is extended enough it could be used in the future as an Athletics Stadium as well as a football and rugby stadium.

In addition to that, primary schools in Hull could be built or expanded as the population of Hull is increasing and if people from different cities and countries come to live in Hull, we will need more schools for their children!

OUR FUTURE

By Elouise Short & Olivia Falconer

Hull is a lively city with lots of shops and a marina. However, in the future we feel there are changes that need to happen. These are:

A series of skyscraper flats that house over 14,000 residents should be built. This will reduce the amount of homeless citizens in Hull and bring more people to the city. We also need more houses for people who have big families.

Hull is a multi-cultural city therefore we think there should be improvements in the amount of Christian churches and Muslim mosques. This is a necessity with the mix of religious beliefs in Hull.

For our younger residents, we think Hull University should be more appealing and there should be an entertainment arena, for bands to play in during the day.

Because of the rush with transport to work, we feel that there should be an underground subway, to help with the outstanding train and road traffic.

Section 6

**COMIC
CREATIONS**

Sunny vs Mr Shaper

By Asailia Blowman

1.

Sunny was walking around enjoying her day, when suddenly her beeper went off! This could mean only one thing; Mr Shaper was back with another evil plan! Mr Shaper's plan was to steal the weather! If he did this then he could make sure it was never sunny! Mr Shaper built a magic gun and aimed it at the sky, with a bang he shot into the air and began to steal the weather!

3.

The dust disappeared and Sunny was standing above Mr Shaper. She had won the fight for the weather! Sunny put everything back to normal and everyone was happy. Once again the day had been saved by Sunny!

2.

Sunny couldn't let this happen! She loved the weather especially when it was nice and sunny! Sunny raced over to Mr Shaper, but by the time she had got there Mr Shaper had already stolen the rain! The sun came out and Sunny felt her powers growing. Before Mr Shaper could steal the sun, Sunny jumped on him and they began to fight! Suddenly there was a massive cloud of dust that covered Sunny and Mr Shaper!

The Book Fair

By Courtney Lill

1.

One sunny day at Malet Lambert, the students and Bubbles were enjoying a wonderful book fair! Elsewhere, Dr Evil was thinking up an evil plan to sabotage the book fair. He would make sure no one would have a nice day!

2.

Dr Evil arrived at Malet Lambert and put his plan into action! He started to sabotage the book fair by firing water everywhere. Bubbles sped over to where Dr Evil was and she managed to throw the water right back in Dr Evil's face!

3.

After that Bubbles kicked Dr Evil's butt and he went flying into space! The book fair went back to normal and everyone had a great time! Dr Evil then started to plan how he would defeat Bubbles next time!

Kolin Kiwi

By Lucy Marsden and Katie Sullivan

1.

One day at Malet Lambert, the students were hard at work. Meanwhile, the evil Dr Banana was creating his cunning plan to sabotage all the students' hard work at school. When his plan was complete Dr Banana burst through the doors of Malet Lambert! He would ruin all the students work! Kolin Kiwi saw this and ran into an empty classroom; seconds later he came out as Mr Kiwi - the amazing superhero!

2.

Dr Banana was now shooting banana skins everywhere! Students were falling over the banana skins and getting hurt! Everywhere was going to be a mess and everyone was going to get hurt if Mr Kiwi didn't save the day quickly!

3.

Without warning, from behind a bookshelf, Mr Kiwi launched his razor sharp kiwis at Dr Banana! Mr Kiwi then ran over to Dr Banana and started fighting him to stop him shooting banana skins. After a short fight Dr Banana was defeated by Mr Kiwi, Dr Banana ran as fast as he could out of Malet Lambert crying! Another day was saved by the amazing Mr Kiwi!

Student Feedback ...

"Amazing, fantastic and brilliant."

"Amazing and fun, it was cool working in teams as we got to meet new people. I loved it."

"It was really good, I absolutly loved it."

"Very enjoyable with helpful and friendly staff and it's very fun."

"Working with you was very enjoyable and I learnt some new skills on writing a newspaper article."

"It was very fun, especially doing the quiz on the whiteboards."
