

Meet your tutor

7DCL – Chevron

Mr Clarke

My specialist subject

I teach Maths and I have always loved it because the answer is either right or wrong. And if it is wrong, you can then see why it is wrong when it is explained.

My journey

I started teaching at Malet Lambert in 2015 and I started teaching at another local secondary school in 2008. I was also a pupil at a local secondary school doing my GCSE's in 1999 and A-Levels in 2001. After that I went to the University of Hull. After leaving university, I wasn't sure what I wanted to do as a career and started working in retail. This included working at Morrisons in Beverley and then I worked as a Deputy Store Manager for Netto (bit like Aldi and Lidl) until I started my teacher training.

My interests

I love sport, especially football and cricket. I am a big Hull City fan and used to go and watch them both home and away. Unfortunately I don't get to go as much due to family commitments. I play Table Tennis in the local league and my team has just been promoted to the Premier league in Hull. So you can say that your tutor is a Premier League player (at table tennis). I have been married for 10 years and have two daughters aged 8 and 4.

My advice to make transition easier

The biggest advice I can give is use your pupil planner when you get it. It has lots of good information about the school and useful pages for each subject such as multiplication table grids and key phrases for languages and many other subjects too. It is useful for you to note down your homework and when it is due so you can organise your work. Staff and students are friendly and will help you out if you aren't to sure where to go.
