

# Meet your tutor

7SDA – Chevron

Mr Day

## My specialist subject

I teach Mathematics and I've always loved it because it is integral to everyday life, you will use maths skills without even thinking about it. Maths is its own language and everyone is able to develop mathematical skills regardless of how easy or difficult they find it.

## My journey

This is my tenth year at Malet Lambert, I began my time here as a teaching assistant within the maths department helping small groups of pupils improve. Six years later I trained to be a teacher and other than a couple of placements at Beverley High School and Headlands School I have remained at Malet Lambert.

## My interests

I love to play sports, my favourite sports are football, rugby league and golf. I support Manchester United and Hull FC (which I'm sure may upset some of you).

I enjoy listening to music and currently my favourite musician is Gerry Cinnamon but I also like bands such as Oasis and the Kaiser Chiefs.

I enjoy learning about history, my Grandad was a Normandy Veteran I am fascinated about the experiences endured by the people who lived through that time. I recently visited northern France and walked in his footsteps along Gold Beach which was really special.

I have a little ginger cat called Mr Jinx and he is forever causing mischief. You will learn lots about him during tutor time.

## My advice to make transition easier

Beginning secondary school will be a memory that lasts with everyone, I still remember my first day many, many years ago. We as your tutors and teachers fully understand some will find it easier than others. First and foremost ensure you maintain high standards, your teachers will be very welcoming but will always maintain high expectations. You will meet many new friends, the school has some great extra-curricular activities such as, sports, drama, music and technology. Get involved and meet new friends with similar interests. Finally, we are all here to make the transition from Primary to Secondary as smooth as it can be, if you are lost around the building in the first few weeks or you are finding something tough, we are always here to help, don't struggle alone, a problem shared is a problem halved (Maths you see!).
