

# Meet your tutor

7SPI – Bluejay

Miss Pickering

## My specialist subject

I teach Maths, which I have loved since being at school myself. I appreciate the logic behind it, and how every topic is related to one another.

## My journey

I have been working at Malet since I qualified as a teacher in 2016.

## My interests

Before I started my job at Malet Lambert, I travelled Australia and Thailand. I really enjoyed all the experiences I gained (including jumping out of a plane!), but not so much the long flights! In January earlier this year, I gave birth to my first baby, so 2020 has been the strangest but most amazing year of my life so far.

## My advice to make transition easier

- Be as organised as you can, so you can adapt easily to the different classes you'll have and be stress free!
- Don't be scared to be yourself, so you can make new friends
- Try lunchtime or afterschool clubs you think you'll like and get involved
- Don't forget to bring your stationary and planner every day
