## Exciting Business Partnership

**As part of our commitment to careers education, we are now in partnership with local and national food producers, Cranswick.**

Cranswick was founded in the 1970's in East Yorkshire and has since grown to become one of the largest food manufacturing businesses in the UK, supplying most of the major UK retailers and food service chains with fresh and added value quality products, whilst also supplying the export market.

They employ over 4,000 people in the city of Hull alone and 12,500 nationwide.

Group Learning and Development Manager for Cranswick, Katy Beadle, will be working alongside our Careers Leader, Miss Powell, to help add a real life element to some of our curriculum.

Katy said, "A large part of my role involves engaging with local enterprises and schools to ensure that they are aware of the early careers which we can offer within the business; that includes apprenticeships, entry level roles and work experience."

"I am looking forward to start working with the school on this Enterprise Advisor partnership."

"As someone who has been through the education system in Hull and has progressed into a role working for one of the city's largest and most successful businesses, I hope my knowledge of the industry and experience in a training and development role will be beneficial for the students and teachers at Malet Lambert."

Cranswick will be supporting us during National Careers Week in March, and are planning a whole year group enterprise activity for Year 8, plus are linking live projects to our subjects for work experience sessions and curriculum assessments

Miss Powell is delighted with the new partnership.

She said, "Cranswick is such a diverse company and can offer us so much in terms of support for careers, particularly for Food and Nutrition courses, but also for many other subjects throughout the school."

## YE Alumni

**Congratulations** to former Young Enterprise participant, **Jack Moxon**, who has been successful in gaining an interview at Cambridge University to study Natural Sciences.

Jack currently studies Physics, Maths and Chemistry at Wilberforce College.

# Key dates for Careers

Friday 29th January

## FAREWELL Mr Millar

Our Careers Co-Ordinator, Mr Millar, retires this term. We wish him a fond farewell and huge thanks for all his wonderful work in CEIAG at Malet Lambert.

## KEEP IN TOUCH

Twitter: @MaletCareers

Email: careers@maletlambert.hull.sch.uk

Careers Team: Miss Powell, room 1.2.03

# LAUNCH yourself

Year 9 & 10 pupils will be taking part in the Launch Yourself programme, developed by Andrew Bernard of Innovative Enterprise.

During tutorial, pupils will be working their way through the sessions and workbooks, exploring their own attitudes to learning, positive thinking, exam skills and career aspiration.

These bitesize sessions are a brilliant way for pupils to work on their skills as a group, and to

create a point of discussion within the classroom.

Year 11 will be able to access this from the Year 11 Careers Group on Google classroom, and can complete independently.

# College Applications

**Log On Move On is an online application system which allows Year 11 pupils to search for local courses, colleges and training providers, and streamlines the application process.**

Pupils have been working on their personal profile over the past couple of months, and many pupils have started to apply.

We recommend that pupils aim to have applied for AT LEAST one education provider by the end of January.

If a pupil has forgotten their login details, please ask them to email Miss Powell on careers@maletlambert.hull.sch.uk, or visit her in room 1.2.03 to have them reset.

Pupils can also contact their Head of House for further support on this. LOMO can be accessed outside of school time too, on laptop/PC or a device.
